

VTrak A-Class

Shared Storage Appliance

Optimized for Adobe® Anywhere for Video

Application Solution

The PROMISE VTrak A-Class Series and Adobe Anywhere for Video is the ideal solution for:

- Broadcast
- Post Production
- House of Worship
- Enterprise Video Applications

Benefits

- ▶ **FAST**
Optimized for high performance, high bandwidth rich media applications and unstructured data requiring large block random or sequential throughput.
- ▶ **SIMPLE**
"All-in-one" metadata appliance, RAID storage subsystem, and file system (VTrakFS™).
- ▶ **SCALABLE**
"Pay as you grow" from 32TB to over 9PB for long-term storage investment protection.
- ▶ **RELIABLE**
Features the same hardware, software, and firmware platform as the Apple-qualified VTrak x30 Series subsystem, with high-availability dual controllers, hot-swappable modular design, and included 3-Year onsite parts replacement warranty.
- ▶ **COST-EFFICIENT**
30-40% rack space and energy savings compared to non-integrated, multi-vendor solutions.

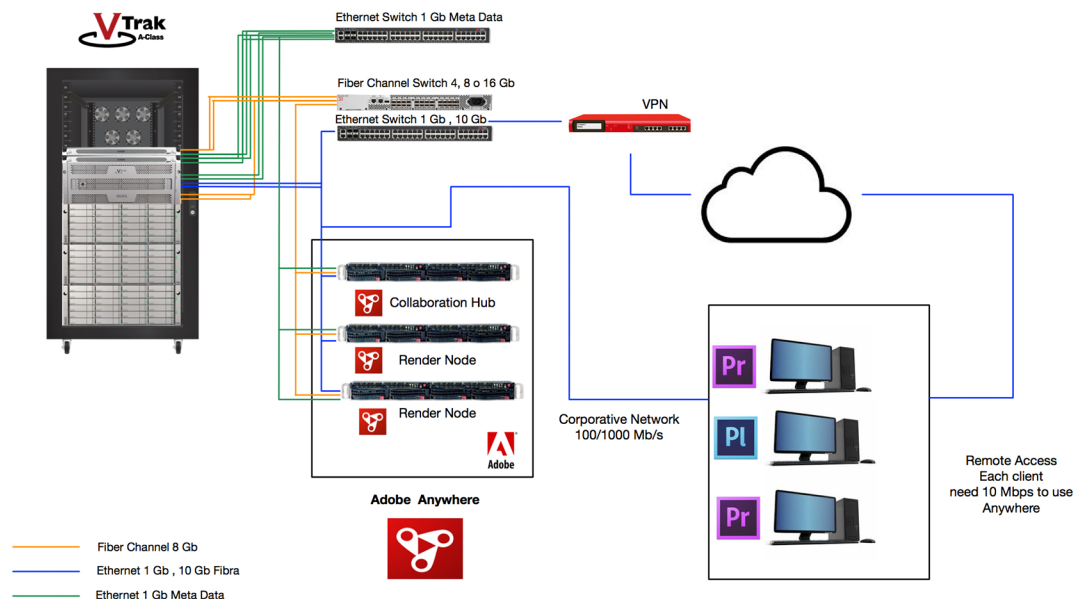

Adobe Premiere Pro and
Adobe Prelude

The High-Performance Scalable Shared SAN RAID Storage for Adobe® Anywhere

Adobe® Anywhere lets teams of video professionals work together to collaborate and create productions from virtually any location in a shared environment. The PROMISE VTrak A-Class and NAS G1100 Gateway, certified for Adobe® Anywhere, is the ideal solution that best harnesses this capability.

Adobe® Anywhere's collaborative workflow platform empowers users of Adobe professional video to work together using centralized media across standard networks. The PROMISE VTrak A-Class series provides the perfect bandwidth performance and storage scalability Anywhere on-premise, giving users complete control and security over their stored media.

With Adobe® Anywhere working across the VTrak A-Class with NAS G1100, Adobe® Premiere Pro CC and Adobe® Prelude CC can take advantage of the reliability and performance of the VTrak A-Class platform using the fast 10GE interface. This makes it the ideal, high performance solution for workflows that require high bandwidth, such as those with rich media applications that need local or remote access to a shared storage network.

About the VTrak A-Class & NAS G1100 Gateway

The VTrak A-Class with NAS G1100 Gateway is a scalable, all-in-one Fibre Channel and Ethernet based shared storage system for large file ingesting, editing and streaming of all types of digital media. VTrak A-Class offers a simple, yet easy setup and is managed from a single management web-based GUI. This all-in-one box comes equipped with:

- Primary and secondary metadata controllers
- Metadata storage
- SAN storage
- Fibre Channel switch
- NAS G1100 Gateway

The VTrak A3800, A3600 with NAS G1100 shared storage comes in 3U or 4U configurations starting as low as 32TB to 144TB on a single VTrak A-Class head. Capacity can scale up to over 9PB while performance can scale out by adding additional expansion and Fibre Channel storage nodes, at no extra licensing costs. Additionally, the NAS G1100 comes with unlimited NAS connections at no additional cost, making this the most effective enterprise class storage solution in the market.

The Cost Effective Solution

The VTrak A-Class reduces the total cost of ownership due to its lower power consumption and rackspace used. The tightly integrated, modular designed system requires no external components. In this fully redundant setup, the lack of cables means cleaner airflow and less points of failure, making it the ideal shared storage solution to work alongside Adobe Anywhere.
