

# Case Study

## Promise VTrak D5000 Unlocks Possibilities For Vestige Digital Investigations

### BACKGROUND

Established in 2004, Vestige Digital Investigations is a leading U.S. Electronic Evidence Experts company specializing in Digital Forensics and Cybersecurity solutions – both proactive and reactive, as well as ESI Consulting. Because Vestige works within the cybersecurity, forensics and electronic discovery solution space, they deal with large volumes of data that need to be accessible by multiple computers for processing and analysis.

### SOLUTION

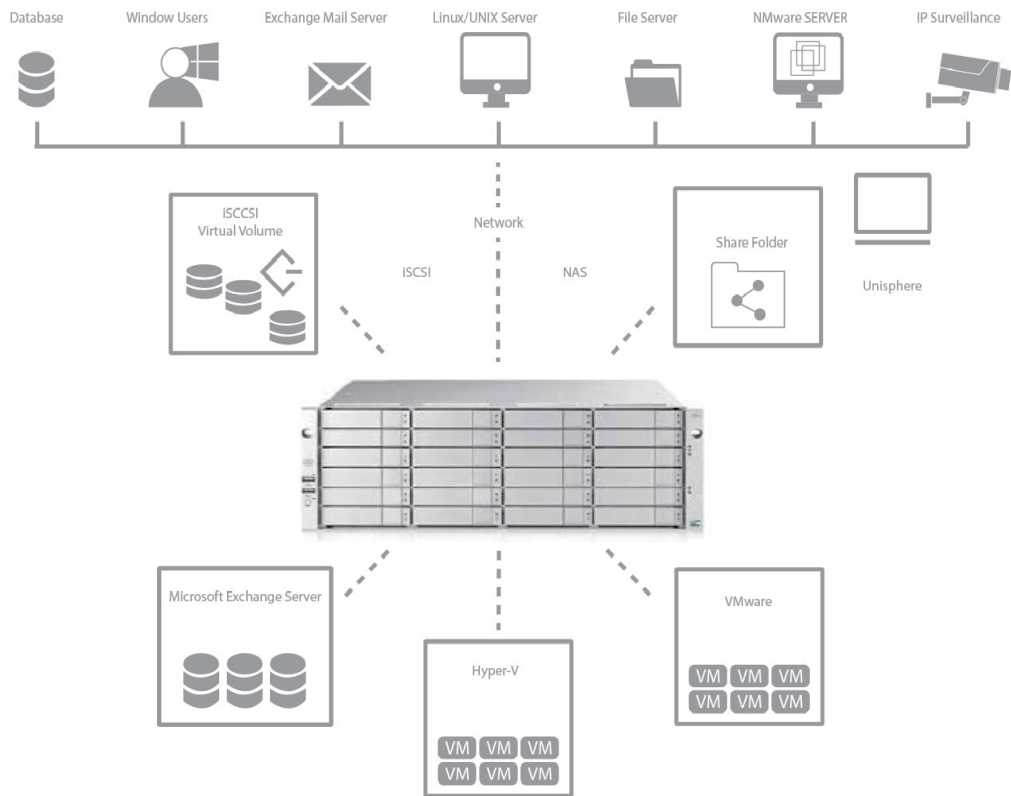

Vestige's previously deployed storage was reaching end-of-life and was maxed out in size so Promise was able to deploy the new VTrak D5000 Series. Vestige selected this as their new storage solution due to the ability to start small and grow big from terabytes to petabytes. The VTrak D5000 not only offered Vestige fast 10GbE performance, it answered their need for highly accessible and collaborative storage and fully integrated with their cybersecurity, forensic and electronic discovery applications that tied directly into their Active Directory environment. Not only was the feature set a must for Vestige, but the cost effective price sealed the deal. Promise was a smarter solution than the competition.

### RESULTS & BUSINESS BENEFITS

- Cost-effective, comprehensive storage solution allowed for Vestige to seamlessly replace its out-of-date and maxed out storage solution
- Best in class technical support. Deployment is a breeze and the 24/7 technical support that includes next business day parts replacement for the first 3 years is indeed top notch
- VTrak D5000 resolved storage limitations and performance bottlenecks
- Future proofing. Start small and have the ability to scale up. Allowed Vestige to begin porting its lab over 10GbE network

VTrak D5800

## VTrak D5000 CUSTOMER TESTIMONIALS

"The VTrak D5000 serves up plenty of storage space for a very economical price. The user interface is very easy to understand and follow, allowing for ease of integration. Promise allows us to start small and scale up to Petabytes under one VTrak D5000 RAID head."

- Greg Kelley, Chief Technology Officer, Vestige Digital Investigations

"It's customers like Vestige that continue to further strengthen our product lines. The VTrak D5000 Series unified storage solution comes fully loaded with drives, high availability, 24x7 technical support, and next business day onsite parts replacement for the first 3 years."

-Behrouz Zali, Vice President Promise Technology Sales
